

**1200** - Color: Pearl (White)

**1005** - Color: Cream (Tan)

### KUNZ® GOATSKIN HIGH VOLTAGE PROTECTORS

Sizes 8-12 - including half sizes

OAL 12-16"

- Gunn cut minimizes seams for increased durability and comfort
- Leather processed to optimized stretch for improved fit and function
- Wear over rubber voltage glove Class 2/20kV - *other classes available*
- Adjustable cinch strap
- High dexterity
- Resists change in shape and texture when exposed to moisture
- Cut Level A1
- Puncture Level 4

**1050** - Color: Cream (White)

**1057** - Color: Tan

### KUNZ® COWHIDE HIGH VOLTAGE PROTECTORS

Sizes 8-12 - including half sizes

OAL 12-16"

- Gunn cut minimizes seams for increased durability and comfort
- Leather processed to optimized stretch for improved fit and function
- Wear over rubber voltage glove Class 2/20kV - *other classes available*
- Adjustable cinch strap
- High durability- ideal for heavy wear
- Good cut and abrasion resistance
- Cut Level A2
- Puncture Level 4

**1007** - Color: Buffed Red

### KUNZ® BUFFED COWHIDE HIGH VOLTAGE PROTECTORS

Sizes 8-12 - including half sizes

OAL 12-16"

- Gunn cut minimizes seams for increased durability and comfort
- Leather processed to optimized stretch for improved fit and function
- Wear over rubber voltage glove Class 2/20kV - *other classes available*
- Adjustable cinch strap
- High durability- ideal for heavy wear
- Cut Level A1
- Puncture Level 3

### DETERMINING SIZE AND LENGTH OF YOUR LEATHER PROTECTORS

Order same size as the rubber glove they will be worn over. For example, order size 10 protector to fit over size 10 rubber insulating gloves.

CUFF LENGTH	PROTECTOR LENGTH
3"	12" OAL
4"	13" OAL
5"	14" OAL
6"	15" OAL
7"	16" OAL

**Clearance min 1" per 10kV**  
example: 2" for 20kV (class 2)

### LENGTH

Per ASTM F496, a minimum 1" per 10kV flashover clearance required between the end of the protector and the end of rubber insulating gloves to protect against traveling arc.

*Leather protectors do not provide shock protection. Protectors are designed and used solely to provide mechanical protection to the rubber insulating glove.*

### CUFF SHAPE OPTIONS

**Straight**

**Contour (CC)**

**Bell (BC)**

### CUFF MATERIAL OPTIONS

**Standard**

- Orange fluorescent with green leather

**All Leather (AL)**

- Red or green available

**All Fluorescent (AF)**

- Orange or yellow available upon request
