H01NYHN

DuPont™ Nomex®

Elastic fit for comfort

√ Stock: One Size Fits Most

FR Beard Net

H01NYBN

DuPont™ Nomex®

Elastic fit for comfort

√ Stock: One Size Fits Most

Food Service Garment Design Guidelines

No Buttons

- Closures should be snaps or secured hook & loop
- Why? All parts of the garment should be securely affixed so there is no chance that something could fall off and contaminate the food.

No Pockets

- Why? Eliminates workers' ability to bring outside objects (phone, pen, etc.) that could contaminate the food, also provides a vessel for food to collect.
- Exception: Some facilities will accept pockets below the waist (ex. pant pockets) because they are made to fall below the level of where something could fall out and contaminate the food.

No loose/hanging components

- No hook & loop tabs, drawstrings, etc.
- Why? Loose or hanging pieces in general can be a safety hazard in manufacturing. They also pose a possible point of contamination.
